### To whom it may concern

Yermi Lahav has been Site Engineer for Nizan Inbar on our project here since June 2003.

This has been an exceedingly difficult project involving as it does new buildings, refurbishing old buildings and constructing a swimming pool and a bridge.

During the time that I have known him I have found him to be intelligent, hard working and helpful. He has tackled problems with a will and a cheerful spirit. His presence will be greatly missed and I would have no hesitation in recommending him for a similar position elsewhere.
